# Lo-Watt Whole House Heat Recovery The Windsor Range

MANHR6000

The powerful MANHR6000 is capable of 110 litres per second at 150Pa, suitable for large houses and commercial properties. With two independently adjustable EC/DC motors, balancing the system for optimum economy and low noise is straightforward. One of the two switched live inputs features a delay-on feature, especially useful for bathroom switching applications.

### Features & Benefits
